- Hold recitations for 25+ students twice per week to review lecture concepts and supervise collaborative labs
- Conduct office hours for 400+ students to help with homework and conceptual understanding
- Grade exams and weekly homework assignments with other teaching assistants

Software Engineer Intern – Meta

May 2022 – Aug 2022

- Created a Python command line interface to aggregate noise metrics when identifying performance regressions
- Integrated bias analysis into over 50,000 continuously running end-to-end Jest tests to report ongoing breakages
- Reduced number of Instagram and Messenger performance irregularities pushed to production by 30%
- Developed SQL queries and data aggregation libraries to allow test authors to analyze historical test data and trends
- Collaborated cross-functionally with developers to provide more coverage against flaky performance tests

Software Engineer Intern – Grapevine AI

Jun 2021 – Aug 2021

- Created a dynamic calendar page in React that helps users schedule meetings and reminders with their contacts
- Integrated robust integration testing and error handling with Cypress and Sentry
- Managed 100+ quality assurance bugs and updates in a fast-paced Agile environment
- Collaborated with UI/UX designers to create and implement new prototypes for the Grapevine AI dashboard website

Full Stack Software Engineer Intern – Boo Dating

Jun 2021 – Aug 2021

- Implemented full stack daily question board and voice messaging features that boosted activity and retention by 300%
- Prototyped fronted designs and translated multi-layer wireframes to Flutter
- Led REST API lifecycle development with thorough design, documentation, and Chai integration testing
- Communicated with growth and product teams about business decisions, database schema designs, and other issues

Web Development Intern – Responsival

Feb 2021 – Apr 2021

- Implemented responsive, mobile-first web applications with HTML, CSS, and JS libraries
